

QPR Quality Pothole Repair

Cold Asphalt Solution for a Quality Pothole Repair

New General Purpose Formula Now Available

Suitable for Pedestrian and Light Traffic Areas

SOME BENEFITS OF QPR FINE®

- Open to traffic immediately
- No mixing or tack coating required
- QPR adheres to concrete, chipseal and asphalt
- Works well in wet conditions
- Bagged and bulk lots readily available

QPR Quality Pothole Repair and QPR Fine are Available from Road Science

QPR High Performance Cold Mix can be used to patch any pothole. For most potholes, simply placing QPR High Performance Cold Mix Asphalt in the pothole and compacting using a hand tamp, or vehicle tire will suffice.

Product Application

It is important to clean the pothole of any debris in order to allow the material to properly adhere to the surface. If the pothole is full of water, QPR cold mix can be placed without removing the water due to its proprietary water-repelling additive. For the best result make sure the initial preparation and compaction is done to a high standard.

Quantities

QPR Quality Pothole Repair is available in the following quantities:

- 22.7 kg bag
- 250 kg bag
- 1000 kg bag
- Bulk 30 Tonne

Applications for

- Pothole repairs
- Utility cuts
- Repairs around service covers for water valves and drains

QPR FINE is a new product with the same application benefits as QPR Quality Pothole Repair, however it is more flexible product and can be used for driveway repairs, footpaths, utility cuts and temporary speed bumps.

Product Application

For the best result make sure the preparation and initial compaction is done to a high standard.

Quantities
