

BRP PATCHES

Road Science, have brought this easy to use product back to the NZ market. Within Downer, BRP Patches have been a valued preventive maintenance product used for many applications.

What is a BRP Patch?

BRP Road Patches are a premade chipseal sheet that is manufactured on paper. A bitumen rubber binder holds precoated aggregates of various sizes. BRP Road Patches are supplied in sheets, they are highly flexible and totally waterproof. They have been used, tested and proven in the field with varying traffic and weather conditions since 1986.

BRP Road Patches will adhere to most surfaces using **Road Science Enviro Tack Emulsion**. Surfaces that can be sealed using a BRP Patch include; chip seal, asphalt, concrete or base course, even timber and metal have been effectively sealed over.

Size, prices and minimum order quantity

BRP Road Patches are available in the following pack and aggregate sizes:

- BRP Road Patch 750mm x 1000mm, **9.5mm aggregate size**, 3 sheets per pack (\$178.00 + freight + GST)
- BRP Road Patch 750mm x 1000mm, **13.2mm aggregate size**, 3 sheets per pack (\$178.00 + freight + GST)

Minimum order quantity: 3 packs per order.

ULTRA MENDER

Ultra Mender is an extremely tough and versatile **cold binder**, perfect for repairs of common pavement and surface defects associated with maintaining your road network.

Standard pavement repair techniques often don't last very long. This results in repeated and regular repairs, culminating in significantly larger, more expensive and time consuming repairs being required.

The Ultra Mender system has been developed to adapt to the varying defects encountered in your road network allowing you to treat the issue before it becomes a serious problem.

Ultra Mender's versatility is achieved through advanced polymer technology which allows it to be applied at ambient temperature before curing in minutes to form a strong plastic-like material. It can be used as either a hard-wearing sealant or mixed with local aggregates to form robust and long lasting patch repairs.

Benefits of using Ultra Mender:

- Prolongs life of weak pavements
- Extremely easy to use
- Avoid repeat repairs
- Excellent rut and crack resistance
- Three times stronger than asphalt
- Cold applied
- Sets in minutes
- Versatile

Price:

\$250.00 per box + freight + GST
4 foil sachets, 2.5kg each (10 litres in total)
